

# **IS 2006**

## **MIL – PRF – 16173 E Grade 4 (Corrosion Preventive Compound) Transparent, Non-tacky film**

### **Description:**

**IS 2006** belongs to the category of anticorrosive products and its aim is to protect the surfaces on which it is applied, from rust and corrosion. When we use **IS 2006** the containing solvent which evaporates leaves on the surface a thick layer which protects the surface from corrosion and rust.

### **Benefits:**

**IS 2006** is suitable for:

- a) The protection of metal surfaces, outboard engines, spare parts etc.
- b) Electric motors, generators, distributors, spark plug, relays etc.

**IS 2006** meets the requirements of the American specification MIL – PRF – 16173 E Grade 4 (transparent, non tacky film) (Corrosion Preventive Compounds).

**This type of Hard Film gives better results against corrosion in relation with other products, which form a soft film.**

### **Usage:**

**IS – 2006** is used by immersion, brush or spray. After its application do not wipe the surface. As the solvent evaporates, it forms a thick layer with the above-mentioned properties.

### **Packaging:**

**IS – 2006** is available in aerosol spray (400 ml) and in pails of 4, 13, 30lt.
