

## **AQUA CHECK**

### **WATER FINDING PASTE FOR PETROLEUM**

### **AND CHEMICAL INDUSTRIES**

#### **Description**

AQUA CHECK is a pink paste which in contact with water changes color, showing the presence of water in gas oil tanks.

AQUA CHECK meets the requirements of MIL-W-83779.

#### **Application**

Place a thin film of AQUA CHECK paste on a clean gauge line rod, approximately where water level is expected to appear. Dip rod into tank until bottom is reached.

The pink color of AQUA CHECK changes to red in contact with water level.

The change of color is instantaneous in gasoline or kerosene and a few seconds longer for dark oils.

#### **Technical properties**

Melting point	: > 50 °C
Time of changing color	: 30 seconds max.
Appearance	: Homogeneous paste.
Stability	: Undeteriorated for one year maximum.

#### **Safety**

AQUA CHECK is not harmful for the health of personnell.

#### **Packaging**

Tubes of 110 grams.
