

KEM-SOLVE-1313

<u>DESCRIPTION</u>: KEM-SOLVE-1313 is a NEW TECHNOLOGY, fast evaporating, contact cleaner for all types of electrical and electronic equipment. Leaves no residues and has a high dielectric constant.

Effectively removes oil, grease, dust, moisture, etc. Safe to all types of plastic and rubber.

BENEFITS:

- Ozone friendly CFC free
- Does not contain chlorinated hydrocarbons
- Ideal for electrical/electronic parts
- Low odor
- Fast evaporation
- No residue
- Safe on plastics

Formulated to replace the product of specification MIL-C- 81302 which usage has been forbidden since it destroys the ozone layer.

APPLICATIONS: KEM-SOLVE-1313 can be used for industrial, office, military, aviation and marine equipment for cleaning all electric and electronic parts and as a general use cleaner, such as:

Circuits Wires Communication equipment Radar **Switches VCRs Distributors** Antennas **Potentiometers** Radios Telephones Oxygen systems Tape recorders Precision assembles, etc. Transistors Aviation material Rheostats Computers Control panels **Televisions Typewriters** Sparkplugs

It is used undiluted and may be applied by brush, dipping or non-atomizing spray. Ensure that all oil, grease, dirt, etc., are removed. The objects are allowed to dry. No rinsing required.

SPECIFICATIONS & APPROVALS

- ➤ AMS 1525 B
- ➤ MIL-PRF-29608
- ➤ ASTM F-519, Type 1C

PRECAUTIONS:

Extremely flammable. For further instructions refer to Material Safety Data Sheet (MSDS).

PACKAGING:

Is available in 4,5 lt, 20 lt. or 25 lt. pails and 210 lt drums and 400 ml. spray – aerosol.
