

SARMOL 2050 **Toilet Bowl Cleaner**

Description

SARMOL – 2050 is a special, blue colored, liquid product with strong disinfectant, cleaning and deodorizing capabilities which is widely used as a household and industrial cleaner of toilet bowls.

SARMOL – 2050 contains special disinfecting agents and various other special additives whose combined action has as a result the great cleaning and disinfecting abilities of the product.

SARMOL – 2050 is approved according to the Greek Legislation by the General Chemical State Laboratory with approval No. 413/1/97.

When **SARMOL – 2050** is used consistently the following are increased:

- Excellent cleaning and disinfection.
- Removes scale completely from toilets
- Deodorizes the toilet area while preventing the formation of unpleasant odors.

Features

- Non-toxic.
- May be diluted in water of all proportions.
- Non-flammable.
- Pleasant odor.
- During its use it does not stain toilet bowl surfaces.

Advantages

Since the product is in liquid form it has the following benefits in comparison to powder products that are used for the same purpose, some of them are:

a) **SARMOL – 2050** is easy to use and 100% soluble in water in comparison to powder products that leave residues and cause problems in drains and sewer systems especially filters in sanitary discharge tanks in airplane or ship chemical toilets.

b) Since it is readily soluble in water it may be used directly as is in all types of toilets.

Usage

SARMOL – 2050 is used as is in a proportion according to the amount of dirt and how frequently it is used.

Application

SARMOL – 2050 is used for household and industrial use in all types of toilets and wherever there is a need for cleaning and disinfecting along with the removal of scale and deodorizing.

Caution

Avoid contact with skin and eyes. In case of contact rinse with plenty of water.
