

KEM – NUTRO

Description

KEM – NUTRO is an alkaline compound suitable for passivated ferrous surfaces and preventing further oxidation.

Application

KEM – NUTRO is used after treating ferrous surfaces with acidic solutions such as our products, SCALE OFF, DESCALER, CEMENT REMOVER, SCALE OFF – S, etc.

Usage

KEM – NUTRO can be applied by spray, mop or immersion, diluted in water in a proportion of 5 – 10% when designated to neutralize ferrous surfaces from acidic solutions.

KEM-NUTRO is diluted with water in a proportion of 1.5 – 3% when it used after acid cleaning to neutralize and passivate boilers, cooling systems, evaporators, etc.

Circulate the solution hot or cold for 2-3 hours empty the system and flush out with water.

If the solution is hot 50-60°C the results are better.

Caution

Avoid contact with skin and eyes. All necessary precautions should be taken. For further information refer to Material Safety Data Sheet (MSDS).

Packaging

KEM – NUTRO is available in plastic pails of 22 kg. and drums of 230 kg.
